

Education

Indian Institute of Information Technology Vadodara <i>M.Tech In Computer Science and Engineering (Artificial Intelligence)</i> CPI: 8.25	Aug 2025 – May 2027 <i>Gandhinagar, Gujarat, India</i>
Dharmsinh Desai University <i>B.Tech In Computer Engineering</i> CPI: 7.24	Oct 2021 – May 2025 <i>Nadiad, Gujarat, India</i>
Sainik School Balachadi-Jamnagar <i>Class X (Secondary) – CBSE</i> Percentage: 79%	May 2014 – May 2019 <i>Jamnagar, Gujarat, India</i>

Experience

BrainyBeam <i>Full Stack Developer</i>	Dec 2024 – May 2025 <i>Internship-Remote, Ahmedabad</i>
- Developed a responsive E-commerce website using MongoDB, Express.js, React, and Node.js, featuring a modern UI with Tailwind CSS. - Implemented key features such as user authentication, product browsing, shopping cart, and order management via RESTful APIs. - Designed a scalable full-stack architecture to handle product data, user sessions, and real-time interactions efficiently. Technologies / Tools Used : MongoDB, React, Node.js, Express, Tailwind CSS	

Projects

Vendor Invoice Intelligence Portal GitHub - Developed a Vendor Invoice Intelligence system using Python, SQL, Scikit-learn, and Streamlit to help automate freight cost prediction and identify risky invoices, reducing manual review efforts for finance teams. - Built machine learning pipelines for data preprocessing, feature engineering, model training, and real-time prediction, while applying statistical testing and hyperparameter tuning to improve model reliability. Technologies / Tools Used : Python, NumPy, Pandas, Seaborn, Matplotlib, Scikit-Learn, Streamlit
ResumeEval AI GitHub - Developed an AI-powered Resume Analyzer utilizing Python, Streamlit, Docker, and LLMs to automate ATS evaluations, conduct role-specific resume analyses, and provide personalized recommendations for AI/ML and Data Science careers. - Constructed an end-to-end resume analysis pipeline with PyPDF2, implementing rule-based ATS scoring and prompt engineering to generate ATS scores, role-fit ratings, keyword gap analyses, project evaluations, and resume improvement suggestions. - Engineered a modular architecture featuring configurable role-based evaluations and interactive Streamlit dashboards; containerized the application with Docker for consistent cross-platform deployment. Technologies / Tools Used : Python, Streamlit, Qwen 2.5 72B, Hugging Face, PyPDF2, Docker
Spotify Insights Dashboard GitHub - Built an end-to-end Spotify-inspired Power BI dashboard to visualize artist performance and global music trends. - Integrated ChatGPT into the workflow to automate complex DAX measure creation, reducing manual coding time and improving data accuracy. - Enhanced user experience with dynamic album art sliders, custom navigation menus, and interactive month-to-quarter toggles. Technologies / Tools Used : PowerBI, SQL

Technical Skills

- Languages :** C,C++, Python, SQL
- Databases :** MySQL, SQLite, MongoDB
- Frameworks & Libraries :** Numpy, Pandas, Seaborn, Scikit-Learn, SciPy, Matplotlib, Node.Js
- Tools & Technologies :** GitHub,Docker,PowerBi
- Soft Skills :** Problem Solving, Adaptability, Creativity
